Once upon a time, in the bustling city of Commerceville, there stood a thriving company known as SupplyWise Inc. Their business was built upon the intricate web of supply chain operations, where every product's journey from production to delivery was a story waiting to be told.

At the heart of SupplyWise Inc.'s operations lay their stock levels – the lifeline of their business. With meticulous planning and strategic management, they ensured their warehouses were always brimming with the products customers desired. Through the power of visualization, they gazed into the depths of their stock levels, uncovering patterns and trends that guided their every decision.

Among the myriad products housed in their warehouses, a select few stood out for their popularity among customers. These top 5 products, adorned with labels of high demand, were the stars of SupplyWise Inc.'s inventory. With each order placed, they embarked on a journey from shelf to shipping box, a testament to the company's unwavering commitment to customer satisfaction.

But behind every product lay a story of cost and logistics. Manufacturing costs and shipping costs intertwined to shape the financial landscape of SupplyWise Inc. Through vivid visualizations, they delved into the distribution of these costs, unraveling insights that illuminated the path to profitability.

As the products prepared to embark on their journey to customers' doorsteps, the choice of shipping carrier became paramount. SupplyWise Inc. meticulously tracked the shipping costs incurred by each carrier, unveiling the intricacies of their partnerships and optimizing their logistics network for efficiency.

Yet, amidst the hustle and bustle of operations, challenges arose – defects in products and disruptions in transportation. Through rigorous analysis, SupplyWise Inc. uncovered the root causes of defects, navigating the turbulent waters of defect rates across various transportation modes.

But amidst the challenges lay opportunities for improvement. Armed with insights from production vs. orders analysis, SupplyWise Inc. embarked on a journey of clustering,

grouping products based on their production volumes and order frequencies. Through this journey, they discovered hidden synergies and untapped potentials, paving the way for enhanced efficiency and innovation.

And so, the story of SupplyWise Inc. continued, a testament to the power of data-driven decision-making in the ever-evolving landscape of business operations. With each chapter unfolded, they forged ahead on their quest for excellence, navigating the twists and turns of the supply chain with resilience and determination.
